

# FRANCESCA DE LAURENTIS

## WEB DEVELOPER

### / ALL ABOUT ME

Inquisitive, striving and resilient person. Following my experience at Founders and Coders, where we built weekly projects in teams, I have kicked off my career in software development and had the opportunity to work on some personal projects, strengthening my logical mindset and my ability to break down large problems into smaller chunks. My background in customer service has taught me the importance of empathy and attention to detail, which I've combined with my coding skills in order to deliver accessible and user-centered apps.

I'm looking forward to joining a team where I can collaborate with my skills and experience, and am excited to learn more in an environment with senior developers.

### >> MY SKILLS

Team player  
Creative spirit  
Fast learner  
Motivated  
Organised time management

### >> COMPETENCIES

HTML5/CSS3  
Sass/CssModules/Bootstrap  
JavaScript/ES6  
React/Redux  
Material-UI/Semantic-UI  
Node/Express  
SQL/Firebase  
Tape/Supertest/Jest  
Wire-framing&Prototyping  
Heroku/Netlify/Vercel  
Agile Methodology

### / EXPERIENCE

#### >> Junior Software Development Coach

\_Nology | February - June 2020

Guided the students through the course as they learn coding languages such as HTML, CSS, and JavaScript. Able to build rapport with the students in a short time, showing great empathy and support. I brought this positivity to remote working too, and continued to support students.

My collaboration as a Junior software development coach increased my ability to focus and my objective-oriented approach, whilst acquiring good skills in organisation, time management and prioritisation.

#### >> Founders&Coders

Full-stack JavaScript bootcamp | July - November 2019

A 18-week, intensive coding bootcamp covering full-stack JavaScript, with the opportunity to work on real projects, and with an emphasis on peer-led learning and pair programming. We practised TDD and an agile approach to project management. Our curriculum and every project we worked on is open source.

#### Projects

##### >> Tech For Better — My Body Back

An app containing self-help material to support people who have experienced sexual assault and encourage them to go for a routine cervical screening

Tech stack: React, Airtable | Role: UX/UI & Developer

##### >> Student Project — NomNom

Built a meal planning app that recommends week long meal plans with common ingredients and provides healthy options in order to reduce food waste

Tech stack: Express, Handlebars, PostgreSQL | Role: DevOps & Developer

#### >> Operation Executive & Assistant Manager

Evan Evans Tours | May 2015- November 2018

Coordinated the efficient running of day-to-day business in the rail department, taking care of the whole process of reservation, planning, operational and customer support

#### >> Team Member

Pret A Manger, London | September 2014- May 2015  
Chipotle, London | October 2013- August 2014

### / EDUCATION HISTORY

#### >> Faculty of law and legal studies

June 2013 - University of Teramo, Italy

#### >> 2012 Awarded a LLP/Erasmus Placement Project, Spain

#### >> 2010/2011 Awarded a LLP/Erasmus Study Project, University of A Coruña, Spain

### / PERSONAL INTERESTS

- > Hiking, Swimming, Cycling and any activities which will challenge myself
- > Travelling, Exploring & Learning foreign languages
- > Reading
